Forecast for Friday 09 Jul 2021

Weather: Increasingly cloudy through the early hours, with a few mist patches and the odd spot of drizzle towards dawn. A cloudy start to Friday with some mist and the odd spot of drizzle, but gradually brightening up by afternoon as cloud lifts from the hills. Cloud bubbling up to give isolated showers in the afternoon, but these dying out in the evening.

Chance of cloud free mountain/hill tops above 600m: 40%, becoming 90% by early afternoon.

Visibility: Locally moderate to poor in mist and drizzle to start with areas of cloud down to 400-500m. Otherwise good, becoming very good or excellent by early afternoon as cloud lifts, with distant peaks clearly seen. Temporary reductions possible in any shower later.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels likely where any more prolonged cloud breaks occur in the afternoon, so adequate protection recommended.

Recent rainfall: measured at Malham: altitude 375m

14:00 on Thu 08 Jul 2021	0mm	1.2mm	18.2mm

Forecast for Saturday 10 Jul 2021

Weather: The odd shower possible through the early hours, with some mist patches around dawn. Variable cloud amounts through the day, with showers becoming more frequent and perhaps heavy and thundery in the afternoon. Showers then mostly dying away through the evening.

Maximum wind: 10-15mph, variable in direction.

Chance of cloud free mountain/hill tops above 600m: 40% becoming 100%.

Visibility: Locally moderate in mist to start with occasional cloud down to 400m. Becoming very good or excellent by afternoon as cloud lifts off the hills, with distant peaks clearly seen. Temporary reductions to moderate or good in any showers.

Temperature: **Valleys:** 11 C becoming 20 C
At 600m: 11 C becoming 14 C
Freezing level: Well above the summits
